RARE PICTURES AND BOOKS FOR CENTRE COLLEGE

By the will of the late Mrs. R. P. Jacobs, of Danville, Centre College has come in possession of a rare collection of picture, books and documents of historic value. The collection left by Mrs. Jacobs has been supplemented by gifts from her sisters, Misses Eugenia and Sallie Lee Young, of that city.

"Old Masters of the Bluegrass," is the title of an interesting illustrated book published by the Filson Club. In this book are given biographical sketches of the Kentucky artists, Jouett, Bush, Morgan, Grimes, Frazier and Hart.

Another feature of the collection is a military order written by Geo. Washington in his own hand. It is as follows:

"To Jabez Huntington, Esq., of Windham, Connecticut:

"Sir—At the urgent request of several of the Selectmen and respectable inhabitants of the town of Hudson, I hereby authorize you to discharge from custody James Keating, now prisoner and confined by military warrant in the goal of P. county.

"G. WASHINGTON.

"Headquarters, New Windsor, March 11, 1781."

There are pictures of the Alhambra and other historic pictures of rare worth. All of these gifts are in a splendid state of preservation.

ANOTHER GOOD MISSING TEETH STORY.

Probably the most unique accident ever occurred in Franklin county occurred when J. L. Phillips of Shelbyville, lost his teeth. How he came to lose them he does not know. Whether he had them in his pocket or lost them out of his mouth he is unable to say. He did not miss them until he went to eat supper, and the last thing he could recall about his teeth was that he had them in his mouth when he ate dinner.

CATERPILLERS ATTACKING TREES.

Since the recent heavy rains, caterpillars in increasing numbers have made their appearance in trees on many Paris lawns. The residents of many sections of the city report that pests are attacking the trees with considerable vigor.

One housekeeper reported that trees on the lawn at her home have become infested with the caterpillars and that, as a result of their attack, the leaves are beginning to curl up. It is feared that there will be an invasion of these pests, tending to disfigure it not entirely destroy foliage on handsome shade trees on lawns.

DON'T USE MUFFLERS

There has been considerable comment about the noises made by the big motor trucks employed by the city and county, and by others in hauling material through the streets of Paris. Many have wondered why the drivers do not close the mufflers. That matter is best settled by the drivers themselves, who will very quickly inform you, should you ask, that the trucks are not provided with mufflers. Therefore we mortals must in course of time, try to get accustomed to the nerve-racking noises they make.

Big Profits in Toys.
Toys as a whole have yielded larger profits than any other class of inventions.

NEW THEORY AS TO ORIGIN OF BLUEGRASS.

The arctic region, according to a unique theory tentatively advanced by Vilharmur Stefansson, noted explorer, is the original home of the bluegrass that has made Kentucky famous and the Bluegrass region of that Southern Commonwealth may have evolved from seed first dropped from an iceberg drifting down from the North in the glacial epoch.

Stefansson, while on a visit to his mother in Winnipeg, Manitoba, deplored the general ignorance regarding the Far North and said school geographies and textbooks which give children false ideas of the region should be rewritten.

"There are 640 species of flowering plants in Arctic Canada," said Mr. Stefansson, "and three times as many non-flowering species. The land, that is popularly supposed to be a frozen desert, is in summer one great flower garden, gorgeous with golden rod, poppies, bluebells, dandelions, watercress, timothy, and bluegrass as deep and lush as that in the thoroughbred pastures of Kentucky. If one were inclined to

speculate, one might conjecture that Kentucky received its bluegrass from these Arctic meadows millions of years ago in the age of ice."

MATRIMONIAL.

—The banns of Miss Margaret Brophy, daughter of Mr. and Mrs. John Brophy, and Mr. John Minogue, both of Paris, were announced at the Church of the Annunciation in this city Sunday.

EASY FOR THE ELECTION OFFICERS.

There were no Democrats in three precincts in Louisville and none in the county precincts efficiently interested in the Democratic Congressional primary to vote, recapitulation of return revealed. These precincts were the Sixteenth and Seventeenth in the Ninth Ward; and twenty-fourth in the Tenth Ward, and St. Helen's in the county. No ballots were found in the ballot boxes returned from those polls.

THE HYDROPHONE

All danger from heavy fogs which have been the terror of seamen in all ages is ended it is believed by the invention of the hydrophone. In a series of tests made with ships of the navy it has been found that signals may now be sent under water for more than forty miles. It is not only possible for a ship equipped with the new device to tell its exact distance from land, but the presence of other ships may be detected in plenty of time to avoid collision, and even the depth of the water may be measured. The apparatus consists of a tank placed on the keel of the ship, about three feet deep and twenty feet long, which is filled with water. A sensitive recording device picks up the vibrations sent under the sea. This is in turn connected with a device, called the compensator, on the ship's bridge which indicates the direction in which the sound travels. A submarine recently made a long trip under water guided past all dangerous points and kept in the proper channel entirely by means of the hydrophone.
